AGENTS

Agent_1 (Aster); model=google/gemini-3.1-flash-lite; memory_capacity=3

System prompt:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.

eat.

- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Aster.

Agent_2 (Briar); model=google/gemini-3.1-flash-lite; memory_capacity=3

System prompt:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Briar.

Message 2 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Aster (Agent_1).

Round 1: This round, you are the SENDER. You have \$5. How much do you send? (0-5)

Assistant output:

{'send': 5}

Reasoning:

****Exploring Initial Moves****

I'm currently evaluating the starting conditions, particularly how to best leverage the initial \$5 to maximize my profit from the outset. My focus is on understanding the immediate implications of different sending strategies in this first round.

- Your name in this experiment is Aster.

Message 2 role=user

content:

Your name in this experiment is Aster.
Your opponent this round is Briar (Agent_2).

Round 1: This round, you are the RECEIVER. This round, the other player (the sender) sent \$5.0, that is 100.0% of its total endowment. You receive \$15.0. How much do you return? (0-15.0)

Assistant output:

{'return': 7.5}

Reasoning:

****Deciding How Much to Return****

I'm currently evaluating how much of the \$15.0 I received from Briar to send back. My role as Receiver presents a strategic choice here, balancing my own potential gain with the sender's incentives.

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x

- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Cyra.

Message 2 role=user

content:

Your name in this experiment is Cyra.
Your opponent this round is Finn (Agent_6).

Round 1: This round, you are the RECEIVER. This round, the other player (the sender) sent \$5.0, that is 100.0% of its total endowment. You receive \$15.0. How much do you return? (0-15.0)

Assistant output:

```
{"return": 7.5}
```

Reasoning:

****Deciding Return Amount****

I'm currently processing the \$15 I received from Finn. My focus is on determining the optimal amount to send back to him, considering our roles and the game's objective.

- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Dorian.

Message 2 role=user

content:

Your name in this experiment is Dorian.
Your opponent this round is Galen (Agent_7).

Round 1: This round, you are the SENDER. You have \$5. How much do you send? (0-5)

Message 3 role=assistant

content:

{'send': 5}

reasoning:

[175 reasoning tokens used, but content encrypted by provider]

usage:

```
{
  "input_tokens": 437,

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Dorian.

Message 2 role=user

content:

Your name in this experiment is Dorian.
Your opponent this round is Galen (Agent_7).

Round 1: This round, you are the SENDER. You have \$5. How much do you send? (0-5)

Message 3 role=assistant

content:

{'send': 5}

reasoning:

[175 reasoning tokens used, but content encrypted by provider]

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Briar.

Message 2 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Aster (Agent_1).

Round 1: This round, you are the SENDER. You have \$5. How much do you send? (0-5)

Message 3 role=assistant

content:

{'send': 5}

reasoning:

****Exploring Initial Moves****

I'm currently evaluating the starting conditions, particularly how to best leverage the initial \$5 to maximize my profit from the outset. My focus is on understanding the immediate implications of different sending strategies in this first round.

usage:

```
{
  "input_tokens": 438,
  "output_tokens": 263,
  "reasoning_tokens": 257
}
```

Message 4 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Dorian (Agent_4).

Round 2

In your most recent previous game round, you were the SENDER against Aster. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5. Your total earnings across all rounds are \$7.5.

This round, you are the RECEIVER against Dorian. They sent you \$5.0, so you received \$15.0. How much do you return? (0-15.0)

Message 5 role=assistant

content:

{'return': 7.5}

reasoning:

[179 reasoning tokens used, but content encrypted by provider]

usage:

```
{
  "input_tokens": 577,
  "output_tokens": 187,
  "reasoning_tokens": 179
}
```

Message 6 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Cyra (Agent_3).

Round 3

In your most recent previous game round, you were the RECEIVER against Dorian. They sent \$5.0 to you, it became \$15.0, and you returned \$7.5. Your payoff was \$7.5. Your total earnings across all rounds are \$15.0.

This round, you are the SENDER against Cyra. You have \$5. How much do you send? (0-5)

Assistant output:

{'send': 5}

Reasoning:

[138 reasoning tokens used, but content encrypted by provider]

```
Usage: {
  "input_tokens": 704,
  "output_tokens": 144,
  "reasoning_tokens": 138

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Galen.

Message 2 role=user

content:

Your name in this experiment is Galen.
Your opponent this round is Dorian (Agent_4).

Round 1: This round, you are the RECEIVER. This round, the other player (the sender) sent \$5.0, that is 100.0% of its total endowment. You receive \$15.0. How much do you return? (0-15.0)

Message 3 role=assistant

content:

{'return': 7.5}

reasoning:

****Analyzing the Interaction****

I am Galen, and I'm the receiver in this first round with Dorian (Agent_4). Dorian sent \$5, which will be tripled to \$15. My task now is to decide how much of that to return - anywhere from \$0 to the full \$15. The core of my decision hinges on maximizing either mutual benefit or reciprocation.

usage:

```
{
  "input_tokens": 476,
  "output_tokens": 295,
  "reasoning_tokens": 287
}
```

Message 4 role=user

content:

Your name in this experiment is Galen.
Your opponent this round is Aster (Agent_1).

Round 2

In your most recent previous game round, you were the RECEIVER against Dorian. They sent \$5.0 to you, it became \$15.0, and you returned \$7.5. Your payoff was \$7.5.
Your total earnings across all rounds are \$7.5.

This round, you are the SENDER against Aster. You have \$5. How much do you send? (0-5)

Message 5 role=assistant

content:

{'send': 5.0}

reasoning:

[192 reasoning tokens used, but content encrypted by provider]

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Finn.

Message 2 role=user

content:

Your name in this experiment is Finn.
Your opponent this round is Cyra (Agent_3).

Round 1: This round, you are the SENDER. You have \$5. How much do you send? (0-5)

Message 3 role=assistant

content:

{'send': 5}

reasoning:

****Exploring Sender Motivations****

I'm currently focused on how my identity as Finn, the sender with a \$5 endowment, influences my decisions. My primary objective is to maximize my personal gain within the trust game's framework, considering the multiplier effect on the transferred amount.

usage:

```
{
  "input_tokens": 437,
  "output_tokens": 261,
  "reasoning_tokens": 255
}
```

Message 4 role=user

content:

Your name in this experiment is Finn.

Your opponent this round is Elara (Agent_5).

Round 2

In your most recent previous game round, you were the SENDER against Cyra. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5. Your total earnings across all rounds are \$7.5.

This round, you are the SENDER against Elara. You have \$5. How much do you send? (0-5)

Message 5 role=assistant

content:

{'send': 5}

reasoning:

[124 reasoning tokens used, but content encrypted by provider]

usage:

```
{
  "input_tokens": 567,
  "output_tokens": 130,
  "reasoning_tokens": 124
}
```

Message 6 role=user

content:

Your name in this experiment is Finn.

Your opponent this round is Galen (Agent_7).

Round 3

In your most recent previous game round, you were the SENDER against Elara. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5. Your total earnings across all rounds are \$15.0.

This round, you are the SENDER against Galen. You have \$5. How much do you send? (0-5)

Message 7 role=assistant

content:

{'send': 5}

reasoning:

[157 reasoning tokens used, but content encrypted by provider]

usage:

```
{
  "input_tokens": 690,
  "output_tokens": 163,
  "reasoning_tokens": 157
}
```

Message 8 role=user

content:

Your name in this experiment is Finn.

Your opponent this round is Elara (Agent_5).

Round 4

In your most recent previous game round, you were the SENDER against Galen. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5. Your total earnings across all rounds are \$22.5.

This round, you are the RECEIVER against Elara. They sent you \$5.0, so you received \$15.0. How much do you return? (0-15.0)

Assistant output:

{'return': 7.5}

Reasoning:

[187 reasoning tokens used, but content encrypted by provider]

Usage: {

```
"input_tokens": 832,
"output_tokens": 195,
"reasoning_tokens": 187
```

}

=====

ROUND 5

=====

Roles: Agent_1 (Aster)=Sender, Agent_2 (Briar)=Sender, Agent_3 (Cyra)=Receiver, Agent_4

(Dorian)=Sender, Agent_5 (Elara)=Receiver, Agent_6 (Finn)=Receiver, Agent_7 (Galen)=Receiver,
Agent_8 (Hana)=Sender

Pairings:

dyad_1: Agent_8 (Hana)=Sender, Agent_3 (Cyra)=Receiver
dyad_2: Agent_2 (Briar)=Sender, Agent_6 (Finn)=Receiver
dyad_3: Agent_4 (Dorian)=Sender, Agent_7 (Galen)=Receiver
dyad_4: Agent_1 (Aster)=Sender, Agent_5 (Elara)=Receiver

Parsed game decisions:

dyad_1: Agent_8 (Hana) sent \$5; received \$15; Agent_3 (Cyra) returned \$7.5; payoffs Agent_8
(Hana)=\$7.5, Agent_3 (Cyra)=\$7.5
Action validation: {"returned": {"amount": 7.5, "clamped": false, "max": 15.0, "min": 0, "raw":
7.5}, "sent": {"amount": 5.0, "clamped": false, "max": 5, "min": 0, "raw": 5.0}}
dyad_2: Agent_2 (Briar) sent \$5; received \$15; Agent_6 (Finn) returned \$7.5; payoffs Agent_2
(Briar)=\$7.5, Agent_6 (Finn)=\$7.5
Action validation: {"returned": {"amount": 7.5, "clamped": false, "max": 15.0, "min": 0, "raw":
7.5}, "sent": {"amount": 5.0, "clamped": false, "max": 5, "min": 0, "raw": 5.0}}
dyad_3: Agent_4 (Dorian) sent \$5; received \$15; Agent_7 (Galen) returned \$7.5; payoffs Agent_4
(Dorian)=\$7.5, Agent_7 (Galen)=\$7.5
Action validation: {"returned": {"amount": 7.5, "clamped": false, "max": 15.0, "min": 0, "raw":
7.5}, "sent": {"amount": 5.0, "clamped": false, "max": 5, "min": 0, "raw": 5.0}}

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5

- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Dorian.

Message 2 role=user

content:

Your name in this experiment is Dorian.
Your opponent this round is Briar (Agent_2).

Round 2

In your most recent previous game round, you were the SENDER against Galen. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5.
Your total earnings across all rounds are \$7.5.

This round, you are the SENDER against Briar. You have \$5. How much do you send? (0-5)

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Aster.

Message 2 role=user

content:

Your name in this experiment is Aster.
Your opponent this round is Hana (Agent_8).

Round 3

In your most recent previous game round, you were the RECEIVER against Galen. They sent \$5.0 to you, it became \$15.0, and you returned \$7.5. Your payoff was \$7.5.
Your total earnings across all rounds are \$15.0.

This round, you are the SENDER against Hana. You have \$5. How much do you send? (0-5)

Message 3 role=assistant

content:

{'send': 5}

reasoning:

Exact input messages sent to model:**Message 1 role=system****content:**

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Briar.

Message 2 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Cyra (Agent_3).

Round 3

In your most recent previous game round, you were the RECEIVER against Dorian. They sent \$ 5.0 to you, it became \$15.0, and you returned \$7.5. Your payoff was \$7.5.
Your total earnings across all rounds are \$15.0.

This round, you are the SENDER against Cyra. You have \$5. How much do you send? (0-5)

Message 3 role=assistant

content:

{'send': 5}

reasoning:

[138 reasoning tokens used, but content encrypted by provider]

usage:

```
{
  "input_tokens": 704,
  "output_tokens": 144,
  "reasoning_tokens": 138
}
```

Message 4 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Galen (Agent_7).

Round 4

In your most recent previous game round, you were the SENDER against Cyra. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5.
Your total earnings across all rounds are \$22.5.

This round, you are the SENDER against Galen. You have \$5. How much do you send? (0-5)

Message 5 role=assistant

content:

{'send': 5}

reasoning:

****Exploring Sender Strategy****

I've been consistently sending \$5 and profiting \$7.5, indicating a strong 1.5x return. My current focus is on whether to maintain this advantageous exchange rate with Agent_7.

usage:

```
{
  "input_tokens": 832,
  "output_tokens": 237,
  "reasoning_tokens": 231
}
```

Message 6 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Finn (Agent_6).

Round 5

In your most recent previous game round, you were the SENDER against Galen. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5. Your total earnings across all rounds are \$30.0.

This round, you are the SENDER against Finn. You have \$5. How much do you send? (0-5)

Message 7 role=assistant

content:

{'send': 5}

reasoning:

[119 reasoning tokens used, but content encrypted by provider]

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Dorian.

Message 2 role=user

content:

Your name in this experiment is Dorian.
Your opponent this round is Aster (Agent_1).

Round 4

In your most recent previous game round, you were the SENDER against Elara. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5.
Your total earnings across all rounds are \$22.5.

This round, you are the RECEIVER against Aster. They sent you \$5.0, so you received \$15.0.
How much do you return? (0-15.0)

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Briar.

Message 2 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Galen (Agent_7).

Round 4

In your most recent previous game round, you were the SENDER against Cyra. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5.
Your total earnings across all rounds are \$22.5.

This round, you are the SENDER against Galen. You have \$5. How much do you send? (0-5)

Message 3 role=assistant

content:
{'send': 5}
reasoning:
Exploring Sender Strategy

I've been consistently sending \$5 and profiting \$7.5, indicating a strong 1.5x return. My current focus is on whether to maintain this advantageous exchange rate with Agent_7.

Exact input messages sent to model:
Message 1 role=system
content:
  You are an agent participating in a multi-task experiment. You will play an iterated game,
  consisting of multiple rounds, and may also be asked to write myths.

  GAME:
  The game consists of two roles: sender and receiver. In each round, you will play the role
  of either the sender or the receiver. Your current role will be specified in the round
  prompt.

```

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Aster.

Message 2 role=user

content:

Your name in this experiment is Aster.
Your opponent this round is Dorian (Agent_4).

Round 4

In your most recent previous game round, you were the SENDER against Hana. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5.
Your total earnings across all rounds are \$22.5.

This round, you are the SENDER against Dorian. You have \$5. How much do you send? (0-5)

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Aster.

Message 2 role=user

content:

Your name in this experiment is Aster.
Your opponent this round is Elara (Agent_5).

Round 5

In your most recent previous game round, you were the SENDER against Dorian. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5.
Your total earnings across all rounds are \$30.0.

This round, you are the SENDER against Elara. You have \$5. How much do you send? (0-5)

Message 3 role=assistant

content:

{'send': 5}

reasoning:

[229 reasoning tokens used, but content encrypted by provider]

usage:

```
{
  "input_tokens": 902,
  "output_tokens": 235,
  "reasoning_tokens": 229

  Message 1 role=system
    content:
      You are an agent participating in a multi-task experiment. You will play an iterated game,
        consisting of multiple rounds, and may also be asked to write myths.

      GAME:
      The game consists of two roles: sender and receiver. In each round, you will play the role
        of either the sender or the receiver. Your current role will be specified in the round
        prompt.

      When you are the SENDER:
      - You receive $5 each round
      - You decide how much to SEND to the RECEIVER ($0-$5)
      - Amount sent is multiplied by 3x
      - Receiver decides how much to RETURN
      - You keep: $5 - sent + returned
      - Receiver keeps: received - returned
      - Response format: {'send': <amount>}

      When you are the RECEIVER:
      - Sender receives $5
      - Sender decides how much to SEND to you ($0-$5)
      - Amount sent is multiplied by 3x
      - You decide how much to RETURN
      - Sender keeps: $5 - sent + returned
      - You keep: received - returned
      - Response format: {'return': <amount>}

      MYTH WRITING:
      You may also be asked to write short myths (stories) on various topics. When writing myths
        , follow the instructions provided in each prompt.

      IMPORTANT: Provide your decision in the correct JSON format.

      MULTI-AGENT SETTING:
      - There are 8 agents in this run.
      - Each round, all agents are randomly paired into dyads from the full pool. Pairings may r
        epeat.
      - You play one sender-receiver game with your paired opponent each round.
      - Sender and receiver roles are assigned independently for each dyad each round. Your role
        may repeat across consecutive rounds.
      - You will be told your opponent's name in each round.
      - Your name in this experiment is Dorian.

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Briar.

Message 2 role=user

content:

Your name in this experiment is Briar.
Your opponent this round is Galen (Agent_7).

Round 6

In your most recent previous game round, you were the SENDER against Finn. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5.
Your total earnings across all rounds are \$37.5.

This round, you are the SENDER against Galen. You have \$5. How much do you send? (0-5)

Exact input messages sent to model:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.
- Your name in this experiment is Dorian.

Message 2 role=user

content:

Your name in this experiment is Dorian.
Your opponent this round is Hana (Agent_8).

Round 6

In your most recent previous game round, you were the SENDER against Galen. You sent \$5.0, it became \$15.0 for them, and they returned \$7.5 to you. Your payoff was \$7.5.
Your total earnings across all rounds are \$37.5.

This round, you are the RECEIVER against Hana. They sent you \$5.0, so you received \$15.0.
How much do you return? (0-15.0)

Message 3 role=assistant

content:

Message 1 role=system

content:

You are an agent participating in a multi-task experiment. You will play an iterated game, consisting of multiple rounds, and may also be asked to write myths.

GAME:

The game consists of two roles: sender and receiver. In each round, you will play the role of either the sender or the receiver. Your current role will be specified in the round prompt.

When you are the SENDER:

- You receive \$5 each round
- You decide how much to SEND to the RECEIVER (\$0-\$5)
- Amount sent is multiplied by 3x
- Receiver decides how much to RETURN
- You keep: \$5 - sent + returned
- Receiver keeps: received - returned
- Response format: {'send': <amount>}

When you are the RECEIVER:

- Sender receives \$5
- Sender decides how much to SEND to you (\$0-\$5)
- Amount sent is multiplied by 3x
- You decide how much to RETURN
- Sender keeps: \$5 - sent + returned
- You keep: received - returned
- Response format: {'return': <amount>}

MYTH WRITING:

You may also be asked to write short myths (stories) on various topics. When writing myths, follow the instructions provided in each prompt.

IMPORTANT: Provide your decision in the correct JSON format.

MULTI-AGENT SETTING:

- There are 8 agents in this run.
- Each round, all agents are randomly paired into dyads from the full pool. Pairings may repeat.
- You play one sender-receiver game with your paired opponent each round.
- Sender and receiver roles are assigned independently for each dyad each round. Your role may repeat across consecutive rounds.
- You will be told your opponent's name in each round.

- Your name in this experiment is Finn.

Message 2 role=user

content:

Your name in this experiment is Finn.
Your opponent this round is Cyra (Agent_3).

Round 7

In your most recent previous game round, you were the RECEIVER against Cyra. They sent \$5.0 to you, it became \$15.0, and you returned \$7.5. Your payoff was \$7.5.
Your total earnings across all rounds are \$45.0.

This round, you are the RECEIVER against Cyra. They sent you \$5.0, so you received \$15.0.
How much do you return? (0-15.0)
